

## CLEAN ENERGY POLICY

**Purpose:** The purpose of **clean energy policy** is to promote the transition from fossil fuels to sustainable, renewable energy sources, thereby achieving multiple environmental, economic, and social objectives and to Create Sustainable Institution for Clean Energy Efficient Mechanism.

### Implementation Strategies:

- KAHER is encouraging enhanced renewable energy for solar rooftop installations for teaching institutions and open access renewable energy for service buildings like hospitals.
- For hot water requirements KAHER is encouraging solar water heaters for hostels, Hospitals and staff quarters.
- KAHER encourages Energy Efficient Diesel Generators/ Machineries' of BS-VI CPCB certified acoustic generators with original equipment manufacturers AMC services for emergency energy backup.
- KAHER indulges in creating awareness among students by orientation of various resources in the campus.
